

Trace your assets anywhere

Asset Tracing Heavy Industries

Asset Tracing Network

The Asset Tracing Network of MobileTrack Heavy Industries is changing the possibilities to guide the persons to the right assets in no time.

With many types of intelligent Location Based Services and ATEX certified tags and beacons you can find assets, monitor and collect data from every device, machine, equipment etc.

The Mobile Universal Gateway (MUG) Tracing system collects and process the data so that the right people, on the right time, on the right location will receive the right information.

The Tracing Network will give you the power to get every and all the right information to maximize your production and safety while reducing the maintenance cost of your on and offshore operations.
