Your own voice and data network

MtagBOX Private

Continuity, flexible and portable

MtagBOX Private

The MtagBOX Private is a plug&play portable mobile system which create instantly your own high-end GSM Voice and Data network.

With the MUG integration capabilities it can be integrated in any system.

It has been developed for the most harsh environments and situations where there is no network coverage at all or there are extremely high demands of network coverage, applications and services.

The MtagBOX Private is available in several models like rental, lease and buy.
